**One interface,
lots of options:**

All of FEIN's 18v cordless product range are now compatible with both BOSCH Professional 18V batteries (since 2008) and AMPShare batteries. This gives you more power, shorter charge times and fewer differing batteries and chargers - leaving you to simply pick the best tool for the job.

DRILLS/DRIVERS

The entire universe of FEIN 18V cordless drill/drivers and impact wrenches are designed especially for applications in metal, steel and machine construction.

OUR HERO: THE ALL ROUNDER

When combined with the QuickIN accessories, the ASCM 18-4 QM(P) AS all-rounder is the only drill/driver to do the job of 8 special tools. With a choice of 13 accessories, the unique QuickIN quick-change system makes up to 11 different applications possible. And with the revolutionary VARIO accessories, FEIN is expanding the range of potential applications of impact wrench/drivers.

Compatible with Bosch Professional 18V batteries (since 2008) and AMPShare batteries.

DOUBLE SPEED THROUGH 4-SPEED TRANSMISSION.

Drilling up to 2 times faster with excellent drilling results. Thanks to the 4-speed full metal gearbox and speeds of up to 4,000 RPM.

PERFECT CONTROL

Up to 40 cm long telescopic additional handle allows optimal control even at high levels torques. Simple keyless adjustment in 25 mm steps at 4 levels.

HAMMER FUNCTION

Switchable striking mechanism for drilling in stone and masonry up to 13 mm.

11 APPLICATIONS WITH ONLY 1 MACHINE.

Changed quickly and without a key: a total of 13 QuickIN accessories enable maximum possible applications including core drilling, hole sawing and tapping.

ERGONOMIC AND SAFE WORK.

The middle handle and the optimally balanced centre of gravity enable fatigue-free work. The intuitive touch panel and the dimmable LED light ensure comfortable working. The KickBack function stops the machine when the insert tool blocks and thus increases security.

MULTIMASTER AMM700

Compatible with Bosch Professional 18V batteries (since 2008) and AMPShare batteries.

ERGONOMIC DESIGN
For even better handling.

THE QUICKEST TOOL CHANGE

The fastest tool changes in less than 3 seconds thanks to the patented tool-free FEIN rapid clamping system. Very simple operation.

ADJUSTABLE POWER
For better control

18 V FEIN POWER DRIVE MOTOR

Particularly powerful and almost wear-free, brushless motor with high efficiency, ability to handle extreme loads and long lifetime.

STOPS IF NECESSARY

Electronic safety shut-off protects users should the saw blade jam in hardwood, for example.

FITS EVERYTHING. FOR EVERY APPLICATION

Maximum versatility through access to the complete range of more than 180 accessories

ELECTRONIC CELL PROTECTION

Reliably protects the battery from overload, overheating and total discharge.

AMPSHARE 18 V BATTERY INTERFACE

Compatible with all AMPShare / Bosch Professional 18 V batteries.

SAFETY HAS A NEW STANDARD - THE PROTAGO

Together with Bouygues Construction group, FEIN has developed a globally unique angle grinder that is set to revolutionise safety on construction sites or in the workshop and whose use will consequently reduce the number of work-related accidents. This safety grinder is the answer to increasing safety requirements - invest in your future today.

NON-REMOVABLE SAFETY HOOD

TOOL-FREE QUICK CLAMPING SYSTEM

USER PROTECTION

thanks to kick-back monitoring, soft start, restart protection, electronic overload protection and braking function.

FULLY ENCLOSED MOTOR HOUSING
protects the motor from ceramic and mineral dusts.

FATIGUE-FREE WORKING
thanks to narrow grip dimensions, compact design and a well-balanced low weight.

SAFE GUIDANCE

thanks to a non-removable additional handle, which can be adjusted into 6 positions.

TWO-HANDED OPERATION
provided by integrated dead mans switch ("Autostop") and permanently fitted additional handle.

INFINITELY VARIABLE ELECTRONIC SPEED PRESELECTION

Compatible with Bosch Professional 18V batteries (since 2008) and AMPShare batteries.

SAWING + CUTTING

OUR HERO - THE F-IRON CUT

Our lightweight flexible circular saw allows up to 50% more material removal when compared to conventional metal hand saws. Equipped with a flame-retardant chip collector, it catches up to 80% of the hot chips, whilst its die-cast aluminium casting protects both the machine and the operator from overheating. The F-Iron Cut circular saw was designed with safety in mind, providing numerous advantages and allowing endless possibilities.

VARIANT	Cordless AHKS 18-57 AS*
BRIEF DESCRIPTION	18 V Circular saw, AS (AMPShare), High performance, Manual speed setting, Cold cuts for cuts with virtually no sparks or burrs, Guide rail adapter for straight, long cuts, Better handling – low weight, ergonomic handles including Softgrip
SCOPE OF SUPPLY	Cordless AHKS 18-57 AS circular saw, circular saw blade for construction steel, swarf collecting vessel (fitted), socket head wrench 5 mm, guide rail adapter, parallel stop, plastic tool case (L-Boxx 136) FEIN recommend pairing with an 8.0Ah battery. Browse our range on page 26

THE NEW F-IRON CUT 57 AS

PROTECTION FROM HOT SWARF

The heat-resistant swarf collecting vessel collects up to 80% of the hot swarf. What's more, the robust die-cast aluminium design protects the tool and user from overheating.

50% MORE MATERIAL IS REMOVED

50% more material is removed than with conventional metal circular saws. Twice as productive as the brushless motor, ProCORE battery and optimally coordinated saw blade interact perfectly. And the tool weighs just 3 kg.

COMPLETE FLEXIBILITY

Thanks to individual speed adjustment, cuts can be made in various materials and profiles without the need for rework. The depth adjustment makes distortion-free cuts possible up to 57 mm.

COMPATIBLE EQUIPMENT

Straight, long cuts as the tool is compatible with common guide rails (Makita, Bosch, Festool, Mafell) thanks to its removable adapter.

30 METRES WITH JUST ONE BATTERY CHARGE. AN AVERAGE OF 150 CUTS

Can be used on site for longer: in 2 mm thick steel with the 8Ah ProCORE battery. Using the AMPShare 18V battery system, delivers constant power.

LASTING POWER

The high power level has no impact on the longevity or performance of the tool because of the high-quality materials used, such as aluminium and stainless steel.

SAWING + CUTTING

Exceed previous limits and explore new depths in metal cutting with FEIN's cordless range of saws. Benefit from ultra precision and spark-free working without workpiece discolouration or deformation - even when working with thicker material. This is because sawing metal produces less friction-induced heat than cutting with an angle grinder. The resulting advantages are numerous - providing safer, more efficient ways of working.

VARIANT		
	Cordless ABAS 18-63 AS*	Cordless ASAS 18-21 K AS*
	18 V ABAS 18-63 Band Saw, Ergonomic and compact band saw for conveniently cutting various materials and mobile applications. SHEET METAL WORKING

The carefree way to nibble: free from sparks and distortion with a perfect view of the work surface since the chips fall away. Even when nibbling a wide range of materials up to a thickness of 5 mm, the compact dimensions of FEIN nibblers make them versatile. You can easily change the direction in which you are working without the need for tools. The best choice for machining sheet metals, such as flat, trapezoid, corrugated sheet metals as well as profiles and pipes.

Making cutting an enjoyable task: even tight radii aren't a problem with FEIN sheet metal shears. Efficient, precise and faultless in any position – even overhead – for quickly machining large areas. No chips whatsoever are produced, there is no loss of material and you can work at maximum speed. The perfect combination of performance and cost-effectiveness.

Chips can be tricky. Just one spiral chip is produced with FEIN slitting shears. The open cutting head also gives you an unobstructed view of the cutting line – for maximum precision and cutting quality. This means that the material is not distorted and remains free of scratches. So you get very clean results when dividing sheet metal, profiles and pipes as cut-offs or cut-outs with little contact pressure. Cornered cuts are also possible.
